## **OUTLINE OF PRESENTATION**

 **Product Introduction**

 **Design for Maintainability**

 **Software Quality Assurance**

 **Project Management**

 **Risk Management**

XXXXXXX

- Prediction of potential areas of maintenance and nature of change
- Taken into consideration in definition phase
- Affect the architectural design
- UI and data expected to change

## Process Goal

## Commitment to Perform

- Organizational policies
- Senior management sponsorship

## Ability to Perform

- Resources
- Training
- Organizational Structures
- Tools

## Activities Performed

- Plans & procedures
- Performing the work tracking it
- Taking corrective action as necessary

## Measurement and Analysis

Examples of the measurements that could be taken to determine status and effectiveness of the activities performed feature

## Verifying Implementation

Reviews and audits by management and SQA

## **OUTLINE OF PRESENTATION**

## Risk Log

Risk Type	Possible risks	Probability	Effects	Plan	Indicators	Status
Tools	<p>Damage of Hardware Device</p> <p>The project involves hardware devices. It is possible the devices will be physically damaged or lost.</p>	Low	<p>Serious</p> <p>If the hardware is crucial for the project, it will take a huge cost to recover the problem</p>	<p>Keep back up devices for use.</p> <p>Make sure to store current devices in a safe environment.</p>	<p>No indication.</p> <p>Carelessness among staff possible.</p>	Not Triggered
Requirements	<p>More changes to requirements than anticipated</p> <p>It is possible that the requirements continually need some updates due to the changes of environment or situations. It may cause too many adjustments of the project development.</p>	Moderate	<p>Tolerable</p> <p>In this case a good project manager can take control of it and motivate the team to update the requirements accordingly</p>	<p>Prepare team for possible changes; be preemptive in designing and coding to insure smooth transition to new requirements.</p>	<p>Bad contact with customer, keep lookout on market and environment to monitor changes.</p>	Not Triggered

**THANK YOU FOR  
YOUR ATTENTION**
