

How to obtain our dataset

1. Go to <https://world.openfoodfacts.org/cgi/search.pl?graph=1>
2. Filter out food by countries : Singapore

The screenshot shows the 'Products search' interface on the Open Food Facts website. The 'Criteria' section is highlighted with a red box. It contains a search bar with the placeholder text 'Search for words present in the product name, generic name, brands, categories, origins and labels'. Below the search bar, there are two criteria selection boxes. The first box is labeled 'countries' and has a dropdown menu showing 'contains'. The second box is labeled 'Singapore' and has a dropdown menu showing 'contains'. To the right of these boxes, there is a 'choose a criterion...' dropdown menu and another 'contains' dropdown menu. Below the 'Criteria' section, there are sections for 'Ingredients' and 'Nutriments'. The 'Ingredients' section has radio buttons for 'Without', 'With', and 'Indifferent' (selected) for 'Additives', 'Ingredients from palm oil', 'Ingredients that may be from palm oil', and 'Ingredients from or that may be from palm oil'. The 'Nutriments' section has a dropdown menu for 'Select a field' and a '<' button.

3. Click download results at the bottom as a csv or xlsx file

The screenshot shows the 'Results on a map' section of the Open Food Facts search results page. Below this section, there is a 'Download results' section. It contains a note: 'Download results in XLSX or CSV format. Please note that for performance reasons, you can download up to 10.000 results only.' Below the note, there are two radio buttons. The first radio button is selected and is labeled 'XLSX format - Excel or LibreOffice'. The second radio button is labeled 'CSV format - Character set: Unicode (UTF-8) - Separator: tabulation (tab)'. Below the radio buttons, there is a blue 'Download' button. The 'Download results' section is highlighted with a red box.
